Experience the **Miracle of PLAY**

As the pioneers of play, we've been creating play solutions since 1927. Our first product, the Miracle Whirl, introduced unprecedented fun and excitement to neighborhoods around the world. Now, we've continued our legacy of innovation through all kinds of play equipment that not only inspire joy, but instill the character kids need to lead the communities of tomorrow.

Play Made by **Families,**
for FAMILIES

Our representatives are located around the globe, ready and waiting to help you shape your community's future of play! And they understand the value of community—many of our representatives are multi-generational families who have built a reputation for providing fun, compelling play solutions. From funding to building, our representatives assist with every step to make sure families and friends in your community have the best play space possible.

Part of that process includes carefully considering your landscape, budget, and equipment specifications. Whether you're starting from square one to build an all-inclusive playground or you're updating a beloved but small neighborhood play space, we work with you to personalize the project according to your community's needs.

What Does a Playground Mean to Your Community?

Kids of all ages and abilities want two things: action and challenge. As they strive for achievement, they'll build resiliency, confidence, and independence — all the key characteristics of a great leader. You're not just building a play space. You're creating an impact on future generations.

When you choose Miracle playground equipment, you're choosing to get hearts pounding with excitement, smiles shining with joy, bellies shaking with laughter, and friends and families gathered for unforgettable adventures. We exist to foster active, healthy lifestyles through thrilling exploration, and we're here to help you shape the next leaders in your community.

Let's make an impact together!

EARLY CHILDHOOD

**Miracle helps
kids of all ages
build the skills
they need to
develop into
future leaders.**

Let's Grow Together!

Miracle's Early Childhood products help children develop their cognitive and physical skills through exciting activity and exploration. Our slides not only offer a classic rush of adrenaline—they help build the vestibular system. Play Panels help to challenge a child's mind and inspire them to think outside the box. Meanwhile the colorful, playfully shaped Bongo® encourage children to engage with the world around them step by step.

Early Childhood excitement continues! Spring Riders and Play Sculptures are an excellent way to exercise both the imagination and the body, giving children the chance to explore across a more immersive play space. Our Mini City line similarly offers a tot-sized community where kids can emulate the ongoings of the neighborhood on their level. Swings are of course a staple for any playground, but with Early Childhood seats such as the Generation Swing, caretakers can bond with their toddler on a deeper level.

Alexandra “Alex” Scott opened her first lemonade stand at four-years-old to raise money for childhood cancer research. Over the course of her own four-year battle with cancer, she raised over one million dollars. Today, her legacy is continued by her family and by supporters around the world through Alex’s Lemonade Stand Foundation; a nonprofit organization that funds cancer research, raises awareness, and supports families affected by childhood cancer.

With every Alex’s Lemonade Stand Panel sold, Miracle donates \$100 to ALSF’s mission to support and empower everyone to help cure childhood cancer.

Miracle® uses high quality materials and state of the art manufacturing processes. Commercial playgrounds and products are subjected to years of environmental and solar exposure. Such extreme exposure takes its toll on paints and pigments, and all colors will fade over time. Therefore, Miracle® does not warrant against color fading or discoloration. It is important to properly maintain your playground to ensure its longevity. Depending on environmental conditions at your location, the installation of fabric shade structures may help to delay fading and discoloration. Actual colors in catalog may vary based on device or monitor settings.
